

# Global Waste Management Policy

Last Updated: October 2018

- This Policy sets News Corp's commitment and policy with regard to waste management

---

## Introduction and Purpose

News Corp (the **Company**) is committed to minimizing its impacts on the environment, growing sustainably and inspiring others to take action. As part of that commitment, this Policy establishes some principles relating to best practices in waste management.

## Scope and Responsibility

This Policy applies globally, to every director, officer, employee or representative of the Company and its majority-owned subsidiaries and divisions (**Business Units**). All stakeholders should understand, respect, implement and promote this Policy.

The Global Environmental Initiative team, on behalf of News Corp more widely, is responsible for implementing this Policy and communicating the progress of such implementation with customers, employees, suppliers and partners. Please contact [gei@newscorp.com](mailto:gei@newscorp.com) if you have any questions or comments on this Policy.

## Requirements

### PRINCIPLE OF WASTE HIERARCHY

Our Business Units employ the principle of waste hierarchy: **Reduce, Reuse & Recycle**. This is applied at every stage of our operations to minimize all types of waste, including general office waste, production waste such as newspaper, packaging and aluminum press plates, hazardous waste such as oils, chemicals and batteries, electronic waste, regulated air emissions, and wastewater. News Corp manages these wastes in accordance with all current applicable governmental regulations.

### COMMITMENT TO A GLOBAL ZERO WASTE GOAL<sup>1</sup>

The Company committed to and achieved a global zero waste goal in 2016 and continues to maintain this commitment for our owned print centers, supported by periodic audits of our operations and of our waste and recycling partners. Our owned print centers recycle the majority of production-related material, including 100% of both our newsprint waste and press plate waste.

### END-OF-LIFE ELECTRONICS

All Business Units will ensure that end-of-life electronics are recycled or disposed of responsibly by returning the material to manufacturers, or through working with third-party e-waste recyclers certified under the [e-Stewards](#), [R2](#) or other specific recycling standards as applicable and where possible.

---

<sup>1</sup> Our goal is to maintain zero waste, as defined by the Zero Waste International Alliance, across our owned print centers. The Zero Waste International Alliance defines zero waste as diverting more than 90% of solid wastes from landfills.
